### Fourth Quarter 2024 Operating Results

For the three months ended December 31, 2024, total investment income was \$70.8 million, compared to \$47.8 million for the quarter ended December 31, 2023. The effective yield on the average debt investments at cost was 16.4% for the fourth quarter of 2024, compared to 16.7% for the fourth quarter of 2023. Effective yields generally include the effects of fees and income accelerations attributed to early loan repayments and other one-time events. Yields may fluctuate quarter-to-quarter depending on the amount of prepayment activity.

Total operating expenses and excise taxes, excluding interest expense, for the fourth quarter of 2024 were \$17.2 million,

compared to \$12.3 million during the fourth quarter of 2023. The increase was primarily attributable to higher compensation associated with additional headcount and amortization of restricted stock grants.

Interest expense for the fourth quarter of 2024 was \$19.1 million, compared to \$10.4 million during the fourth quarter of 2023. The increase was primarily attributable to the increase in weighted average debt outstanding.

Net investment income was approximately \$34.6 million, or \$0.58 per share based on 59.4 million basic weighted average shares outstanding for the fourth quarter of 2024, compared to \$25.1 million or \$0.57 per share for the fourth quarter of 2023 based on 44.3 million basic weighted average shares outstanding.

During the three months ended December 31, 2024, our net change in unrealized appreciation totaled approximately \$2.0 million, which included net unrealized depreciation of \$3.3 million from our debt investments, net unrealized appreciation of \$4.4 million from our equity investments and net unrealized appreciation of \$0.9 million from our warrant investments.

Net realized gain on investments was approximately \$9.3 million primarily due to warrant and equity sales.

Net increase in net assets resulting from operations was \$45.9 million, or \$0.77 per share, based on 59.4 million basic weighted average shares outstanding. This compares to a net increase in net assets resulting from operations of \$17.7 million, or \$0.40 per share, based on 44.3 million basic weighted average shares outstanding for the fourth quarter of 2023.

### Net Asset Value

Total net assets at the end of the fourth quarter of 2024 increased by 8.7% to \$823.0 million, compared to \$756.8 million at the end of the third quarter of 2024. The increase in total net assets was primarily due to net investment income exceeding the declared dividend, portfolio activity, and accretive ATM offerings. NAV per share increased to \$13.35 per share in the fourth quarter from \$13.13 per share as of September 30, 2024.
